

NOTICE OF JOB OPENING

DATE: 7/18/08

APPLICATION DEADLINE: 7/25/08

Brake Press Operator – 2nd Shift

Operator will be responsible for both machine set up and operation. This will include loading tooling, creating CNC forming programs, first piece inspection of all production runs, troubleshooting problems as they occur and performing routine preventative maintenance as scheduled. Operator will also be responsible for following production schedules and meeting deadlines, as well as miscellaneous duties, as required. The ability to read blueprints is highly recommended for this position.
